Cybersecurity Posture Checklist

Part of our mission involves safeguarding American businesses against cyber threats. To fulfill this commitment, we've developed a Cybersecurity Posture Checklist. This checklist enables you to assess whether your organization currently has the essential cybersecurity solutions demanded by today's businesses.

Evaluate your cyber readiness in just 10 minutes.

- ☐ **We employ regularly updated antivirus software to all Endpoints**
- ☐ **Individual end users do not have admin rights to their computers.**
- ☐ **We automatically lock computers after users are idle for five minutes.**
- ☐ **We implement password hygiene best practices and require password changes every 90 days.**
- ☐ **We provide team members with reoccurring cybersecurity training and test with imulated phishing campaigns.**
- ☐ **We use multifactor authentication (MFA) to secure our data (e.g., cloud-based applications).**
- ☐ **We have a documented process for deactivating the accounts of terminated employees.**
- ☐ **We regularly patch and update all computers on our networks on schedule.**
- ☐ **We maintain backups of our data off-premises (i.e., outside the office).**
- ☐ **We use a business-grade firewall at all locations.**
- ☐ **We have a cybersecurity insurance policy**

If you need help checking all the boxes, contact One Circle Solutions. We would be happy to assist you in
developing a plan that will mitigate risks and help you thrive.

We appreciate you taking the time to evaluate your organization. Working together, we can protect the future of successful organizations from cyberattacks – like yours
